

## Data Management & Reporting

Energy Advantage's Data Management & Reporting provides effective solutions to collect, track, analyze, and report on your energy and environmental data

Do you have a energy and environmental data management process in place today which accurately tracks, analyzes and reports your data?

Are you confident that you understand the total cost of your organization's energy use and environmental impact?

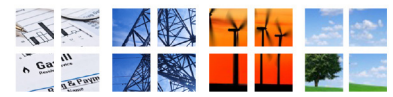

Is your organization faced with stakeholder demands to publicly report environmental performance?

At Energy Advantage our experience has shown that the establishment of an enterprise-wide energy and environmental data foundation combined with expert analysis is a key element to being able to respond to the above questions in a manner that will deliver best results. With a data foundation in place along with on-going expert analysis the stage is then set for organizations to make better decisions which lead to improved

risk management, cost savings and a reduced environmental impact.

Energy Advantage does the 'heavy lifting' involved in the collection, management, analysis, reporting and on-going maintenance of this comprehensive data foundation on behalf of multi-location organizations and others alike.

Along with this 'heavy lifting' we provide you with proactive expert analysis across the entire energy use value chain to measure energy costs, consumption, and greenhouse gas emissions, enabling you to report your energy use and environmental impact with confidence. Ultimately, we help you make better decisions to reduce both your energy costs and your environmental impact.

## Data Management & Reporting Solutions

### Data Input & Bill Validation (Advantage Reporting)

You can't manage what you don't measure. Data Input & Utility Bill Validation services provide a comprehensive and reliable solution for collecting, validating, recording, analyzing and reporting your energy data. Data Input & Bill Validation services offer a proven solution for multi-location organizations and others in response to the complex challenge of collecting and managing energy data through a secure system including quality assurance, on-going management and maintenance.

### Utility Bill Payment & Accounting (Invoice Advantage)

Energy Advantage collects, processes and pays over 15,000 utility invoices monthly and identifies and fully rectifies billing errors on behalf of its clients as they relate to energy costs, late payment charges, and consumption behaviour. The Energy Advantage Utility Bill Payment & Accounting service is CICA 5970 compliant, which is equivalent to US SAS 70, and is highly effective in reducing administrative costs, identifying saving opportunities and improving overall data accuracy. Energy Advantage has identified and captured over \$10 million in direct billing errors on behalf of its customers.

### Energy & Emissions Reporting

Energy use is a principal source of carbon emissions. With an effective energy data foundation in place you can track energy and related emission data to establish baselines, greenhouse gas inventories, and report on your carbon footprint with confidence. Energy Advantage's Client Portal, which is fully integrated with our entire solution offering, provides you with 7X24 access to your customized energy and environmental data and allows you to run standard and user-defined reports at the click of a button.

### Benefits of Data Management & Reporting Solutions

- On-going maintenance and management of utility accounts;
- Qualified energy experts managing your energy utility bills;
- Prioritize energy related capital investment opportunities;
- Improved budgeting for energy costs;
- Account/facility/region/corporate level reporting of your energy costs and consumption;
- Reduced administrative costs;
- Centralized location for all your energy data;
- Troubleshoot energy problems and billing errors; and
- Refund of identified billing anomalies.

### Reporting & Communications Strategy

In support of your overall sustainability program initiatives or other related corporate-wide initiatives, Energy Advantage's Reporting and Communication Strategy solution, utilizing web-based technology, provides a comprehensive scorecard of energy data and results tailored to your specific internal and external reporting and communications needs.

### Analytics

Energy Advantage combines our energy and environmental expertise across the entire energy use value chain with our data centric approach to provide you with the insight and expert analysis to identify and recommend actions to help you make informed decisions that drive improved budget accuracy, greater efficiency and cost savings.
