

## Energy Efficiency

Energy Advantage's Energy Efficiency solutions identify energy savings opportunities that reduce energy costs, mitigate risks and enhance your brand reputation

Do you understand your company's energy use?

Are you faced with the challenge of optimizing your company's capital expenditure for maximum savings?

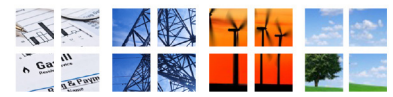

Are you looking to reduce your energy costs and consumption behaviour?

There are many short-term energy cost and consumption practices that can help your company reduce energy expenditures in a timely manner. At Energy Advantage, our energy efficiency experts can help you understand your energy profile and identify the right opportunities to manage energy efficiently in your operations.

### Benefits of Energy Efficiency Solutions

Reduction of your organization's overall use of energy by:

- Reduced energy costs;
- Reduced energy consumption;
- Identification of energy savings opportunities;
- Eliminated wasted energy in your operations;
- Mitigated energy risks;
- Optimization of energy technologies;
- Enhanced brand reputation; and
- Improved return on investments in efficient time periods.

## Energy Efficiency Solutions

### Energy Awareness Program

Educating stakeholders is often one of the most cost-effective methods to reduce energy usage. Energy Advantage's energy awareness program revolves around developing a sustainable program, including strategy development, communication planning, content development, employee training and post implementation reporting and analysis.

### Building Simulations

Understanding your building's energy profile and inefficiencies can significantly impact the life cycle of the building. Energy Advantage's building simulation solution includes conducting energy simulations on new and/or existing buildings to identify and evaluate potential energy savings opportunities in the facility's operations and technology to reduce overall energy costs and consumption.

### Energy Audits

Utilizing our seven step approach, Energy Advantage will analyze historical energy data and benchmark it against industry standards, evaluate energy intensity measures associated with building or equipment usage, identify energy savings opportunities and deliver detailed results in a final report to your organization.

### Distributed Renewable Energy

Energy Advantage will provide a total program life cycle solution for your renewable energy challenges. Energy Advantage's renewable solution includes feasibility assessments, business case development, solution design and procurement, implementation, and ongoing monitoring and verification of your renewable program.

### Monitor and Verification

Monitoring and verifying energy savings measures are essential for the success of energy management initiatives. Energy Advantage's monitor and verification solution will provide your organization with current best practice techniques to track and evaluate energy-savings initiatives.

### Incentives Management

Energy Advantage maintains a comprehensive knowledge of the full range of incentive programs available in North America. We will help your organization by identifying, facilitating, completing and submitting applications in support of all eligible energy management programs.
