

Position: Senior Engineer, Energy Efficiency Programs

Energy Advantage Inc. provides comprehensive energy and sustainability management solutions and expertise which help its many longstanding and new customers in Canada and globally reduce their environmental impact and achieve energy cost savings. We are currently looking for an Senior Engineer, Energy Efficiency Programs at our Burlington, Ontario head office.

The Senior Engineer, Energy Efficiency Programs is accountable for the establishment of sustainable energy management programs. Reporting to the Director, the focus of this position is to help energy end-users significantly reduce their energy utilization. This is an exciting opportunity for the right candidate to grow and develop their skills while participating in a dynamic international working environment.

Responsibilities

- Conduct or direct on-site energy assessments to identify energy savings opportunities and quantify these energy savings opportunities using engineering calculations and energy management guidelines
- Assist in concept development and implementation of energy efficiency programs for clients
- Direct building simulations for commercial, retail and institutional clients (DOE-2, EE-4, E-Quest)
- Provide or supervise monitoring and verification analysis for energy efficiency projects
- Provide or supervise energy consumption analysis for Baseline Reports, Quarterly Reports and Annual Reviews in conjunction with the Client Services and Operations Group

Qualifications

- Five to ten years experience in the industrial, commercial or institutional environments
- Bachelor's degree or diploma in an engineering discipline
- Solid understanding of energy efficiency in commercial, industrial and institutional applications
- Experience dealing with government energy agencies and utilities
- Strong computer skills (i.e. Microsoft Office)
- Superior data analysis, interpretation and problem solving skills
- Excellent organizational and planning skills and ability to be flexible
- Superior communication (written and oral) and collaboration skills
- Ability to work in a fast-paced and highly fluid environment
- Periodic travel required
